

addNewProf Class Reference

The **addNewProf** class this is a special type of classes in qt, class form when creating an object from it and opening it a dialogue appears to the user this dialogue is ued to add new prof to the database. [More...](#)

```
#include <addnewprof.h>
```

Inheritance diagram for addNewProf:

Public Slots

void **recieve_all_profs** (QVector< **profsCLASS** * > vector_1)
recieve_all_profs this slot is evoked when sending all prof

Signals

void **sendProfData** (QVector< **profsCLASS** * > vector)
sendProfData this signal sends the newly created prof data

Public Member Functions

addNewProf (QWidget *parent=nullptr)

Detailed Description

The **addNewProf** class this is a special type of classes in qt, class form when creating an object from it and opening it a dialogue appears to the user this dialogue is ued to add new prof to the database.

Member Function Documentation

◆ **recieve_all_profs**

```
void addNewProf::recieve_all_profs ( QVector< profsCLASS * > vector_1 )
```

slot

recieve_all_profs this slot is evoked when sending all prof

Parameters

vector_1

◆ sendProfData

```
void addNewProf::sendProfData ( QVector< profsCLASS * > vector )
```

signal

sendProfData this signal sends the newly created prof data

Parameters

vector
